	acts or defaults of any of its subcontractors, its agents or employees, as if they were the acts or defaults of the Contractor.
26.3	Core clause 26.3 to be amended as follows: The Contractor submits the conditions of contract for each subcontract to the Project Manager and may redact all commercially sensitive information.

C2.1 PRICING ASSUMPTIONS: OPTION A

1 How work is priced and assessed for payment

Clause 11 in NEC3 Engineering and Construction Contract (ECC3) Option A states:

- | | | |
|-------------------------------------|------------|---|
| Identified and defined terms | 11
11.2 | <p>(20) The Activity Schedule is the <i>activity schedule</i> unless later changed in accordance with this contract.</p> <p>(22) Defined Cost is the cost of the components in the Shorter Schedule of Cost Components whether work is subcontracted or not excluding the cost of preparing quotations for compensation events.</p> <p>(27) The Price for Work Done to Date is the total of the Prices for</p> <ul style="list-style-type: none"> • each group of completed activities and • each completed activity which is not in a group. <p>A completed activity is one which is without Defects which would either delay or be covered by immediately following work.</p> <p>(30) The Prices are the lump sum prices for each of the activities on the Activity Schedule unless later changed in accordance with this contract.</p> |
|-------------------------------------|------------|---|

This confirms that Option A is a lump sum form of contract where the work is broken down into activities, each of which is priced by the tendering contractor as a lump sum. Only completed activities are assessed for payment at each assessment date; no part payment is made if the activity is not completed by the assessment date.

1. Function of the Activity Schedule

Clause 54.1 in Option A states: "Information in the Activity Schedule is not Works Information or Site Information". This confirms that specifications and descriptions of the work or any constraints on how it is to be done are not included in the Activity Schedule but in the Works Information. This is further confirmed by Clause 20.1 which states, "The *Contractor* Provides the Works in accordance with the Works Information". Hence the *Contractor* does **not** Provide the Works in accordance with the Activity Schedule. **The Activity Schedule is only a pricing document.**

2. Link to the programme

Clause 31.4 states that "The *Contractor* provides information which shows how each activity on the Activity Schedule relates to the operations on each programme which he submits for acceptance". **Ideally the tendering contractor will develop a high level programme first then resource each activity and thus arrive at the lump sum price for that activity both of which can be entered into the *activity schedule*.**

3. Preparing the activity schedule

Generally it is the tendering contractor who prepares the *activity schedule* by breaking down the work described within the Works Information into suitable activities which can be well defined, shown on a programme and priced as a lump sum.

The *Employer*, in his Instructions to Tenderers or in a Tender Schedule, may have listed some items that

he requires the *Contractor* to include in his *activity schedule* and be priced accordingly.

It is assumed that in preparing his *activity schedule* the *Contractor*:

- i. Has taken account of the guidance given in the ECC3 Guidance Notes pages 19 and 20;
- ii. Understands the function of the Activity Schedule and how work is priced and paid for;
- iii. Is aware of the need to link the Activity Schedule to activities shown on his programme;
- iv. Has listed and priced activities in the *activity schedule* which are inclusive of everything necessary and incidental to Providing the Works in accordance with the Works Information, as it was at the time of tender, as well as correct any Defects not caused by an *Employer's* risk;
- v. Has priced work he decides not to show as a separate activity within the Prices of other listed activities in order to fulfil the obligation to complete the *works* for the tendered total of the Prices.
- vi. Understands there is no adjustment to the lump sum Activity Schedule price if the amount, or quantity, of work within that activity later turns out to be different to that which the *Contractor* estimated at time of tender. The only basis for a change to the Prices is as a result of a compensation event.
- vii. The access to the site is through the SGB or school Principal and Bidders should note the following;

C2.2 PRICING INSTRUCTIONS

- 1 The Activity Schedule to be priced is to be drawn up by the Contractor.
- 2 The agreement is based on the NEC3 suite of documents, Option A. The additions, deletions and alterations to the NEC3 document as well as the contract specific variables are as stated in the Contract Data.

- 5 The Contractor is required to make designs for the works. The Contractor will assume responsibility for design for suitability for purpose for the portion of the works which he has designed.

Part C2: PRICING DATA

INDEPENDENT DEVELOPMENT TRUST

THE APPOINTMENT OF A CONTRACTOR (TURNKEY) FOR THE CONSTRUCTION OF LUSIKISIKI VILLAGE JUNIOR SECONDARY SCHOOL, EASTERN CAPE

C2.1 Pricing Instructions

C2.1.1 Pricing Instruction to the contractor

1. The Agreement is based on the Option A Price Contract with Activity Schedule – PRING SCHEDULE. It includes core and secondary option clauses, the schedules of cost components, and contract data
2. It will be assumed that prices included in the Activity Schedule are based on Acts, Ordinances, Regulations, By-laws, International Standards and National Standards that were published 28 days before the closing date for tenders. (Refer to www.stanza.org.za or www.iso.org for information on standards).
3. The prices and rates in these Activity Schedule shall be fully inclusive prices for the work described under the items. Such prices and rates shall cover all costs and expenses that may be required in and for the execution of the work described in accordance with the provisions of the Works Information, and shall cover the cost of all general risks, liabilities, and obligations set forth or implied in the Contract Data, as well as overhead charges and profit.
4. Bidders are to take note that the contract price adjustments are not applicable to this contract. Bidders should therefore make provision in the Contract Sum, schedule of rates, etc. for possible price increases during the contract period, as no claims in this regard shall be considered/entertained.
5. An item against which no price is entered will be considered to be covered by the other prices or rates in the Activity Schedule. A single lump sum will apply should a number of items be grouped together for pricing purposes.
6. Tenderers are reminded that some of the works are to be undertaken under restrictive site conditions, over protected environments.
7. Tenderers are reminded and hereby given the opportunity to allow for and price all costs related to the abnormal working conditions referred to herein as no claims for additional costs will be entertained for any omission on the part of tenderers.
8. Tenderers are given the option to include the above mentioned additional costs in their tender amount as a lump sum amount in item under a section in the **Activity Schedule**. Alternatively, Tenderers tendered rates or amounts shall be deemed to include for all such costs.
9. The tenderer is to acquaint himself as to the specific requirements of this tender. **No claim will be entertained due to the failure of the tenderer to allow for these requirements.**

C2.1.2 Function of the Activity Schedule

Clause 54.1 in Option A states: "Information in the Activity Schedule is not Works Information or Site
ADDENDUM TO THE NEC3 CONTRACT **PG 90**

Information". This confirms that specifications and descriptions of the work or any constraints on how it is to be done are not included in the Activity Schedule but in the Works Information. This is further confirmed by Clause 20.1 which states, "The *Contractor* Provides the Works in accordance with the Works Information". Hence the *Contractor* does **not** Provide the Works in accordance with the Activity Schedule. The Activity Schedule is only a pricing document.

C2.1.3 Link to the programme

Clause 31.4 states that "The *Contractor* provides information which shows how each activity on the Activity Schedule relates to the operations on each programme which he submits for acceptance". Ideally the tendering contractor will develop a high level programme first then resource each activity and thus arrive at the lump sum price for that activity both of which can be entered into the *activity schedule*.

C2.1.4. Preparing the activity schedule

Generally, it is the tendering contractor who prepares the *activity schedule* by breaking down the work described within the Works Information into suitable activities which can be well defined, shown on a programme and priced as a lump sum.

C2.1.5. Assumptions

It is assumed that in preparing his *activity schedule* the *Contractor*:

- Has taken account of the guidance given in the ECC3 Guidance Notes pages 19 and 20;
- Understands the function of the Activity Schedule and how work is priced and paid for;
- Is aware of the need to link the Activity Schedule to activities shown on his programme;
- Has listed and priced activities in the *activity schedule* which are inclusive of everything necessary and incidental to Providing the Works in accordance with the Works Information, as it was at the time of tender, as well as correct any Defects not caused by an *Employer's* risk;
- Has priced work he decides not to show as a separate activity within the Prices of other listed activities in order to fulfil the obligation to complete the *works* for the tendered total of the Prices.
- Understands there is no adjustment to the lump sum Activity Schedule price if the amount, or quantity, of work within that activity later turns out to be different to that which the *Contractor* estimated at time of tender. The only basis for a change to the Prices is as a result of a compensation event.

DATE

Important Notes to the Contractor:

Activity Schedule relates to a programme where each activity is allocated a price and interim payments are made against completion of each activity. Its advantage is that it simplifies the administration of the interim payment process.

The **Activity Schedule** is submitted together with a contract programme as part of the tender. It is important that all the activities priced add up to the tender sum and that major sub-contractors participate in the allocation of prices against their programmed activities.

The **Activity Schedule** shall covers all the main activities required, separating each element of work that is sub-contracted. Some preliminaries, such as site offices, need a separate price bar for set up, operational use and dismantling activities. Other preliminaries such as staff and electrical consumption will be part of a constant bar.

Bars that are longer than a month then have their bar line split by defining more accurately the piece of work completed in that period. A time-defined period is acceptable in the case of preliminaries. The price allocated to each total element of work is then proportionately split to match the more defined elements.

The bidder must ensure that the pricing of the **Activity Schedule** is not unduly front-loaded and fairly reflects normal cash-flow curves associated with building projects.

The programme must show how the activities on the **Activity Schedule** are programmed. The programme and the **activity schedule** need not show exactly the same activities, but there should be correlation between them.
